Precision Harvesting

Automating traceability while giving you rich insights into your yields and productivity

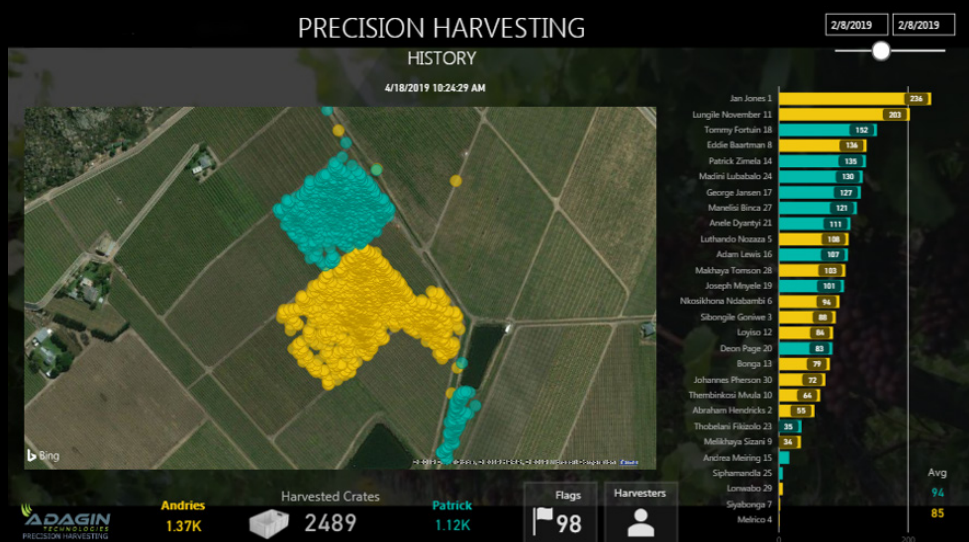

Why we do it:

- Tracing captures date, time and GPS location of each and every crate and links to the harvester - including the GPS location of a harvest opens a whole new world of insights to increase yields
- Increasing the price of labour requires new methods to accurately measure productivity, and we have the solution
- Great designs and practicality is what drives our products and us

Why use our technology?

- Made for farmers by farmers: We understand the farmer's perspective on typical problems and liaise with team members from the industry to find solutions to overcome the challenges on farms
- We solve real problems which means our products are more than just a "nice to have" tool
- Yield map reporting provides farmers with previously unseen information about their orchard performance which can increase yields

Smart-Weigh

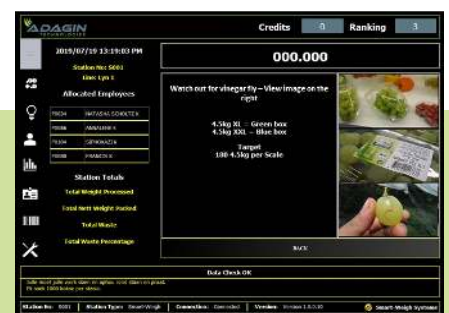

Increasing profit by decreasing waste and overpacking

Why we do it:

- We help the farmers increase productivity;
- While decreasing waste and eliminating overpacking of their produce

Why use our technology?

- We understand farm dynamics and our hardware is custom built to deal with these challenges
- Our reporting tools provide great insights into productivity, waste and yields, which help managers and long-term decision making
- Data gathered by the scales is crucial for monitoring and tracing productivity of personnel and orchards
- Our scales have been in the industry for over 5 years and we keep innovating with our clients to ensure their equipment stay relevant for years to come

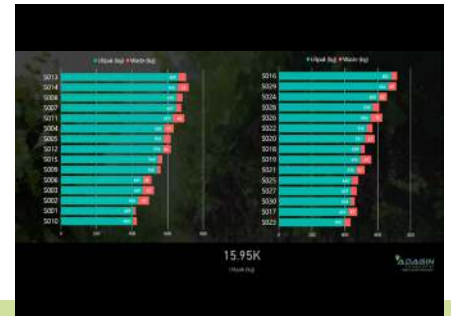

Precision Packing

Orchard to pack house oversight on one screen

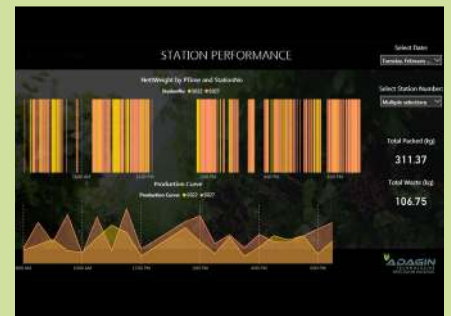

Why we do it:

- We understand that with hundreds of variables constantly at play during the packing season, it is easy to lose site of the bigger picture
- With Precision Packing we bring it all together to provide farmers with live insights into their daily packing

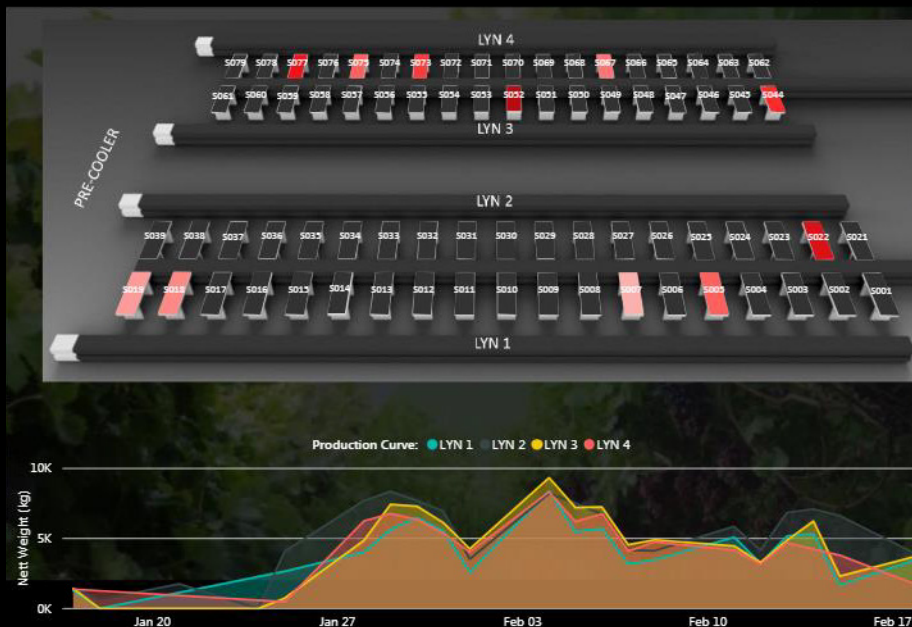

Why use our technology?

- We combine state of the art technologies and their modules to provide inputs into the bigger picture around packing
- With experienced team members on the Precision Packing Project, we know what Key Performance Indicators add the most value to the daily operations for optimal operation

PACKHOUSE OVERVIEW HISTORY

Time and Attendance

The smart way to simplify wages

Why we do it:

- We understand the challenges farmers face with gathering of valuable data from the farm
- We appreciate that farm managers are not clerks that constantly have to fill in forms or know how to use impractical tools to gather data
- Increasing wages requires better insights to understand where most man hours are being spent and we can assist here
- We keep collection of data user-friendly, practical and simple for managers and workers in the field

Why use our technology?

- We use simple rugged mobile phones to collect the same data as expensive custom hardware
- Smart Phones are constantly updated to keep our software relevant
- Data received from the orchards in real-time presented in dashboards that are user-friendly and provide greater insights into operations and wages
- Our data is increasingly integrated with existing systems for automated payrolls
